A Roadmap for Success...

It's a well known fact that most projects go off the track at some point. In fact the Standish Group say that up to 84% of projects fail to meet customer needs.

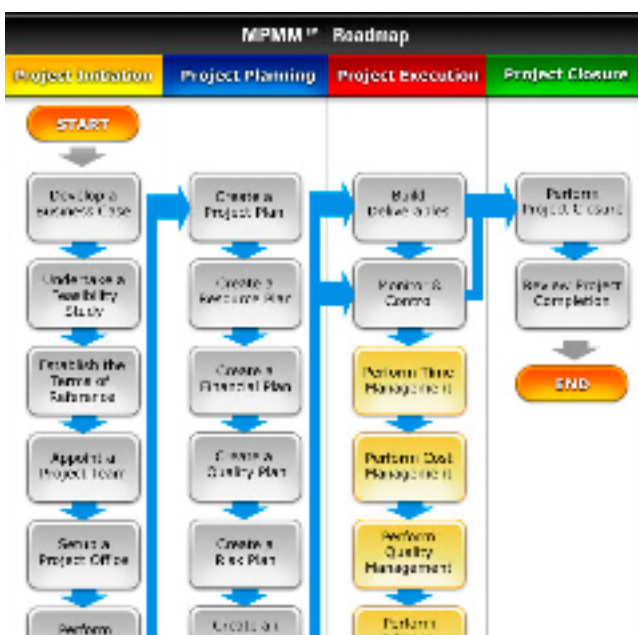

So why is it so hard to stay on-track?

There are lots of reasons, such as poor sponsorship, reporting and communications. But the no. 1 reason is that Project Managers often fail to set a clear direction for the project. Without a clear direction, their projects suffer scope creep, cost overruns and delays.

How can you avoid this?

The answer is simple; use a project management **methodology** to set a clear direction ahead. An effective Methodology will give you a "roadmap" for delivering your project, as it guides you towards your target destination and it tells you what you need to do to achieve it.

MPMM provides such a roadmap, by describing all of the steps you need to take to deliver your project successfully.

By completing each of the steps in the MPMM roadmap, you'll be able to:
